

My Review-

The book 'Miss Peregrine's Home for Peculiar Children' tells the tale of a 16-year-old teenage boy named Jacob Portman, who decides to embark on an overseas journey to a remote island off the coast of Wales, where he discovers an abandoned orphanage, and learns the truth behind his grandfather's mysterious death and past life.

The author, Ransom Riggs, began collecting pictures with strange and mysterious looking children that allowed him to create his own conclusions and build a thrilling, yet quirky novel that has enchanted and haunted people's fantasies with unheard of occurrences.

Personally, I really enjoyed the novel as it always kept me entertained with its originality and witty, intelligent dialogue that left me wanting to read on. The novel also is an eccentric read, distinguished by well-developed characters, allowing readers to easily understand the backgrounds and origins of Riggs' positively terrifying story. The book also incorporates vintage black and white photos, that allow the reader to capture their imaginings and makes them come to life, as they enable to create a peculiar, yet picturesque image with its various gothic fonts and spine-chilling page designs. Who wouldn't like an exciting thriller?

The book would appeal to people who enjoy fantasy and mystery books, as it has a combination of imaginative plots and eerie cliff-hangers, that leave readers engrossed in a gothic-inspired spectacular. It is a mystery that you'd race to solve before Jacob, the main character, figures it out himself!

Overall, the contemporary fantasy has opened my eyes to a world of peculiarities and suspense, which has helped me understand both fiction and historically-inspired ways of writing. While I was reading, I was catapulted into a world of mystery, as I, myself, attempted to put the pieces together and solve the question we all wonder...
