

16 March 2021

Dear Parent/Carer

Thank you for all your support with helping us to do the initial testing enabling students to be back in school full time. We now need to move on to the next phase of students testing at home. We have included guidance videos and links to further information for your convenience.

Taking test kits home

Students will be provided with home test kits, which will be brought home over the next three days. They will have a pack of 3 in a box with a separate leaflet on how to take the test and report the results. They will need to take the tests on the evenings on **Sundays** and **Wednesdays**.

Taking the test

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you [how to take the test](#).

This does not replace symptomatic testing. If you have symptoms, you should self-isolate immediately, book a PCR test and follow national guidelines.

Can students take the test themselves?

Students aged 12-17 should do the test themselves with adult supervision. The adult may help the student to take the test if they need support.

Students aged 11 must be tested by an adult and the adult must report the result. The result of each test needs to be reported using the NHS Test & Trace self-report website:

<https://www.gov.uk/report-covid19-result>.

You will also need to **tell the school of any positive results** of each test by emailing covid19@bramhallhigh.stockport.sch.uk.

Why take part?

Taking part in testing is voluntary and students will be able to attend school whether they take part in testing or not. Nonetheless I am strongly encouraging all students to take part. The testing students at home is only one of the measures we can take in order to reduce the spread of the virus in our community.

Thank you for your support.

Yours sincerely

Mr P Williams

Headteacher: Mr Paul Williams BSc (Hons), MAEd

Bramhall High School, Seal Road, Bramhall, Stockport, SK7 2JT

Some frequently asked questions

What should you do after the test?

If anyone tests **positive**, your household, any support bubbles you are part of should self-isolate immediately in line with NHS Test and Trace guidance for 10 days.

Parents should report the **positive** result to both [NHS Test and Trace](#) and to school. They will also need to [order a confirmatory PCR test](#) if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at School/college).

If the result of the test is **unclear (void)** another test will need to be done.

Negative and void results should be reported to [NHS Test & Trace](#).

A negative result does not guarantee that your son/daughter are not carrying the virus. So, they should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing hands and observing social distancing.

If you or anyone in your household gets symptoms of the virus you should follow [national guidelines on self-isolation and testing](#).

Do I need to give consent?

Students and parents don't need to give written consent to take part in the home testing programme. Please read the information below on how personal information and test results are shared and the privacy notice [\[Click Here\]](#).

Reporting problems or issues with testing?

If there is an issue with the test kit, for example something is missing, please report it by calling **119**.

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>.

What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

How are LFD tests different to PCR tests?

There are 2 main types of test to check if you have coronavirus:

- Polymerase Chain Reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- Lateral Flow Device (LFD) tests detect proteins called 'antigens' produced by the virus - they give rapid results within 30 minutes

What does it mean if I have a positive result?

If you have a positive antigen LFD test result you, your household and any support bubbles you are part of should self-isolate immediately in line with NHS Test and Trace guidance for 10 days. You need to report your result to both NHS Test & Trace and your school.

You should order a confirmatory PCR test if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at school).

You can [book a test here](#).

What does it mean if I have a negative result?

A negative result does not guarantee that you are not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

What if I have a void result?

If the result of the test is unclear (void), your son/daughter should take another one. If the next test is also void, you should take a PCR test. You can [book a test here](#).

All test results need to be reported to [NHS Test & Trace](#).

Do I need to send the test to a lab?

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to administer the test.

How do you report the result?

Once you have taken the test, you will need to report the result online (whether it is positive, negative or void) using this [service](#). You will receive a text or email from NHS Test & Trace confirming that you have reported your test result.

All positive test results need to be reported to both [NHS Test & Trace](#) and school.

Can someone else in my household use a test kit sent home from school?

No, however whole families and households with primary school, secondary school, and college age children, including childcare and support bubbles, will be able to test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker www.gov.uk/find-covid-19-lateral-flow-test-site or check your local council website)
- collect tests to do at home, find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://www.nhs.uk/covid-19-test-finder)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on www.gov.uk/order-coronavirus-rapid-lateral-flow-tests

There is [more information available about testing for households and bubbles of students](#).

How will personal information and test results be shared?

To report your result, you will need to share some information about yourself, so that your test result can be traced.

You need to tell the Department for Health and Social Care (DHSC):

- your name
- your test result
- the reference number on the test Kit

You will also need to tell your school or college your test result.

Under UK law, your school or college collect and store test result data because it is in the 'public interest'.

Schools and colleges will only share information with the Department of Health and Social Care (DHSC) if the test kits used are found to be faulty. If this happens, DHSC will use our information to contact people who used the faulty tests, so that they can be tested again.

When you report test results online, you are sharing information with DHSC. They will share it with your GP, local government, NHS, and Public Health England. This is so that they can offer you health services and guidance if you need to self-isolate. They might also use your data anonymously (without your name or contact information) to research COVID-19, and improve our understanding of the virus.

For more information on how personal data is used for testing please see the detailed privacy notice [\[Click Here\]](#).
